

# 防防外挂原理概述

- ✧ DLL Injection
- ✧ Kernel Driver
- ✧ Process WhiteList
- ✧ Suspend Thread, Image Path, etc.

```
1 Public Class frmMain
2     Private Declare Function OpenProcess Lib "kernel32" (ByVal Access As Integer, ByVal Handle As Boolean, ByVal ProcessId As Integer) As IntPtr
3     Private Declare Function ReadProcessMemory Lib "kernel32" (ByVal hProcess As IntPtr, ByVal lpBaseAddress As Integer, ByRef lpBuffer As Integer, ByVal nSize As Integer, ...)
```
